Self-Driving Bus in Suffolk: The Future of Public Transport? | ADASTRA Prototype Trial (2026)

Entremarneetforet | 08 Nov 2026, 06:54 SGT

Suffolk displayed the ADASTRA autonomous shuttle prototype as part of a trial to integrate self-driving shuttle services into its future mobility network, with the council working alongside Smart City Consultancy and Ohmio UK on a 325,000 pound feasibility study. The New Zealand-developed vehicle has no steering wheel or driver's seat, carries up to 14 passengers and reaches 40 mph, though trial runs were restricted to eight seated passengers at 15 mph. The trial tests technical, operational and regulatory aspects of autonomous shuttles in the UK.

US Regulators Propose Cyan Lights for Self-Driving Cars (2026)

Tadrouseyecentre | 08 Nov 2026, 06:34 SGT

NHTSA proposed optional cyan marker lamps for vehicles equipped with automated driving systems, specifying color, placement and activation requirements to visually signal that a vehicle is operating without a human driver. The proposal aims to help police and other drivers identify self-driving cars as automated vehicles proliferate on US roads.

Waymo adds nearly 250 square miles and warns of winter service pauses - TrustList

Trustlist | 08 Nov 2026, 06:05 SGT

Waymo expanded driverless service by nearly 250 square miles across five US metro areas, adding Torrance, La Jolla and a Berryessa BART link. On 5 November Waymo told riders severe weather pauses may last hours or even days. The disclosure sets explicit winter availability limits on a service increasingly written into corporate travel policies.

Hyundai and Kia will repair millions of vehicles under a deal to fix anti-theft technology

Wbrz | 08 Nov 2026, 05:31 SGT

Hyundai and Kia reached a nationwide settlement with 35 states, led by Minnesota Attorney General Keith Ellison, requiring free repairs to millions of vehicles that lacked engine immobilizers and were left vulnerable to theft. The remedy could cost the automakers over 500 million dollars, and all future US-sold vehicles must include immobilizers, with up to 4.5 million dollars in restitution for theft-damaged vehicles. The settlement addresses a well-documented design weakness exploited in viral theft challenges targeting keyless ignition models. Affected owners must obtain the free software and hardware remedy through dealers.

Tesla Gets 5-Week Extension for FSD Probe Response: What's Next for Autopilot? (2026)

Lakotahkennels | 08 Nov 2026, 04:45 SGT

NHTSA granted Tesla a five-week extension to respond to information requests in its federal probe of Full Self-Driving and Autopilot, after the original December deadline carried daily penalties for non-compliance. Tesla reported 8,313 potential traffic violation complaints but can process only about 300 per day. The extension signals escalating regulatory scrutiny of Tesla's driver assist systems in the US.

Regulators Circle Tesla’s Driverless Push | Political Insiders

Politicalinsiders | 08 Nov 2026, 03:30 SGT

Tesla launched paid Cybercab robotaxi service in Austin in September and told regulators the vehicles meet federal safety rules, while NHTSA opened an audit into the certification and the car's lack of manual controls. Elon Musk said Gigafactory Texas will shift from Cybertruck to Cybercab production next year. The audit tests whether a purpose-built vehicle without manual controls can clear US federal safety compliance.

Uber, Pony.ai and Verne plan robotaxi launch in Zagreb – DailySynapse

Dailysynapse | 08 Nov 2026, 02:47 SGT

Uber, Pony.ai and Croatian startup Verne announced plans to launch Europe's first commercial robotaxi service in Zagreb, with Uber providing the ride-hailing platform, Pony.ai supplying autonomous driving technology and Verne handling operations and regulatory approval. The fleet will use BAIC's ARCFOX Alpha T5 electric SUV equipped with Pony.ai's seventh-generation system. No launch date is set, but initial deployment is underway, signaling Europe's first commercial robotaxi push.

Japan’s cybersecurity nightmare also everyone else’s problem too | BusinessMirror

Businessmirror | 08 Nov 2026, 02:37 SGT

A February 2022 hack of Kojima Industries, a small supplier of cup holders, USB sockets and interior parts, forced Toyota to halt 14 factories at an estimated cost of about 375 million dollars. The incident illustrates how a low-tier supplier with weak security can disrupt an entire OEM production network. Kojima took months to restore operations to near-normal levels, and the case sits within a broader wave of ransomware attacks on Japanese manufacturers. The event supports supply-chain security requirements and tiered assurance obligations for smaller automotive suppliers.

India's New Cybersecurity Rules for Autonomous Vehicles: What You Need to Know (2026)

Racerpm | 07 Nov 2026, 20:59 SGT

India's Ministry of Road Transport and Highways has published draft rules mandating cybersecurity (AIS-189) and software update management (AIS-190) for specified vehicle categories, aligning with EU, Japanese and South Korean standards. Implementation will be phased by risk exposure, prioritizing vehicles with higher automation levels and over-the-air update capability. The rules would impose formal cybersecurity and update governance obligations on OEMs selling into the Indian market. The draft is open for comment, and final timelines and enforcement details are still pending.

Senators Ask Automakers For Update On Cybersecurity Protection Measures - THE PLUG MAGAZINE

Theplugmag | 07 Nov 2026, 17:56 SGT

Senators Richard Blumenthal and Edward Markey sent letters to 18 automakers demanding updates on how they protect vehicle owners from cyberattacks and privacy invasions tied to in-car electronic systems. The inquiry follows high-profile incidents in which researchers hacked vehicle entertainment systems, in some cases gaining control of the car. It renews Markey's 2013 investigation into automotive cybersecurity vulnerabilities and pressures manufacturers on infotainment and connected-system security. The letters seek disclosure of protective measures, signaling continued legislative scrutiny of automaker security practices.

???? ????????? ??????? ????????? ??????????... ?????????????????? ??????????! - Tamil DriveSpark

Tamil | 07 Nov 2026, 17:28 SGT

Researchers at Chalmers and the University of Gothenburg analyzed 413 vulnerabilities in automotive-related software and concluded that risks from apps and cloud services connected to vehicles have tripled compared with the previous decade. The affected systems include mobile apps and cloud backends that expose owner data such as home address, GPS traces, and driving history. Many flaws were trivial, including unchanged passwords, echoing the 2015 Jeep Cherokee media system takeover that led Fiat Chrysler to recall 1.4 million vehicles. The findings point to a need for stronger authentication and secure cloud design across connected car services.

The Next UN Rulebook for Tesla Assisted Driving Is Due to Take Effect on 24 December

Teslant | 07 Nov 2026, 14:33 SGT

The 02 series of amendments to UN Regulation 171, governing supervised driver-assistance systems like Tesla Assisted Driving, takes effect 24 December 2026 per UK Department for Transport calculations. The update adds provisions for system-initiated manoeuvres outside motorways and hands-off phases plus speed-limit assistance, areas where Dutch approval of Tesla's system required exemptions. No authority has confirmed whether Tesla's software meets the new text.

Chinese EV Data Collection: A Global Concern (2026)

Diiica | 07 Nov 2026, 05:24 SGT

Researchers in the Project Lion Cage study drove a NIO ES8 electric SUV into a Norwegian underground mine and severed its external connections, yet the vehicle kept attempting to reach servers, most of them located in China. The finding points to persistent telemetry and data collection behavior in Chinese-made connected vehicles that continues even when connectivity is deliberately blocked. The risk extends to data sovereignty and surveillance concerns for fleets and consumers in Europe and elsewhere. No patch or remediation is described, leaving the behavior as an unresolved compliance and procurement issue for regulators.

Nio's Massive Recall: 246,000+ EVs Affected by Software Glitch (2026)

Solatatech | 07 Nov 2026, 03:21 SGT

Nio is recalling 246,229 ES8, ES6, and EC6 vehicles built on the NT 1.0 platform between March 2018 and January 2023 after a software glitch was found to cause brief blackouts of the dashboard and center display. The failure can hide critical information such as vehicle speed and fault alerts from the driver. Nio is remediating the defect via an over-the-air update to Aspen 3.5.6 or Alder 2.1.0 rather than a dealer visit. The case illustrates how OTA delivery is becoming the default recall mechanism for software-defined vehicle safety defects in China.

GM’s Brake Software Fix for Fast Cadillac and Chevy EVs Missed a Corner Case

Theautowire | 07 Nov 2026, 01:12 SGT

GM filed a Part 573 recall covering 67,380 vehicles after its brake system control module (BSCM) software was found to cause temporary loss of braking at low speeds during sharp turns with light brake application. Affected models include certain 2023-2027 Cadillac LYRIQ, 2024-2027 Chevrolet Blazer EV, 2025-2026 Cadillac CELESTIQ, and 2026-2027 Cadillac VISTIQ EVs. The defect mirrors an earlier recall intended to address nearly the same problem, indicating the prior fix missed a corner case. A corrected BSCM software remedy is required, and the repeat failure raises questions about GM's validation coverage for low-speed braking logic.

DPA Magazine | SIM cards pose severe surveillance risks to smart devices

Dpaonthenet | 06 Nov 2026, 22:08 SGT

University of Birmingham researchers presented findings at the 2026 USENIX WOOT Conference showing that malicious or compromised SIM cards can exploit the Proactive SIM feature to send special commands directly to a device modem. The attack surface affects smartphones and connected vehicles, allowing attackers to gather device information, disrupt connectivity, and pivot to further compromise. For automotive, this expands the threat model beyond the telematics unit to the SIM provisioning and supply chain. No specific patch is cited, so mitigation depends on modem hardening and SIM supply chain controls.

Uber to have 700 robotaxis by year’s end | Smart Cities Dive

Smartcitiesdive | 06 Nov 2026, 19:16 SGT

Uber CEO Dara Khosrowshahi said the platform expects about 700 robotaxis by year's end, growing past 2,000 in 2027. Uber will launch driverless service with Zoox in Las Vegas, followed by Motional vehicles, and plans public rides in San Francisco and Houston early next year. The targets show Uber's multi-partner strategy to scale autonomous rideshare.

Seguro, datos y pruebas: así quieren habilitar los vehículos autónomos en Argentina

Newsdigitales | 06 Nov 2026, 19:08 SGT

Argentina's PRO party introduced a bill to create a comprehensive regulatory framework for autonomous vehicles, addressing insurance, civil liability, road infrastructure and data protection gaps left after the government added autonomous driving to traffic rules in 2025. The proposal signals Latin American legislative momentum toward enabling AV deployment beyond the current regulatory vacuum.

Grab AV near-miss with girl in Punggol under review | The Straits Times

The Straits Times | 06 Nov 2026, 18:35 SGT

Singapore's Land Transport Authority directed Grab to narrow its autonomous vehicle testing in Punggol after a near-miss in which an AV making a left turn at a green light nearly struck a girl who was pulled back by a woman. Grab is reviewing the incident with LTA and WeRide, following an earlier AV crash nearby in January. The case underscores regulatory scrutiny of AV safety in Singapore.

India’s New Cybersecurity & Software Update Rules for Connected Cars: What You Need to Know (2026)

Ekovalevsky | 06 Nov 2026, 18:30 SGT

India's Ministry of Road Transport and Highways published draft rules mandating cybersecurity (AIS-189) and software-update management (AIS-190) for specified connected and autonomous vehicle categories. The requirements align India with frameworks already established by the European Union, Japan, and South Korea. The phased approach targets risk mitigation across the connected vehicle lifecycle. Automakers selling in India will need to adapt compliance programmes to the new standards once finalized.

Bosch, cybersecurity and radar: new technologies for connected motorbikes - EICMA

Eicma | 06 Nov 2026, 16:48 SGT

Bosch unveiled a new generation Central Gateway for connected motorcycles at EICMA, offered in Light and Base versions with 16 and 39 pins alongside the existing 99-pin High variant. The gateway protects on-board electronic networks from cyberattacks and helps manufacturers meet UN Regulations R155 and R156, which impose cybersecurity requirements on two-wheelers starting in 2027. Bosch also showcased ARAS radar systems now fitted to the Triumph Tiger 1200. The development signals that motorcycle cybersecurity is moving toward the same regulatory baseline already applied to passenger cars.

BYD Company stock faces EU security review request

Ad-Hoc-News | 06 Nov 2026, 16:43 SGT

Fourteen European lawmakers requested that the European Commission assess whether BYD vehicles pose a security threat, a move reported by Reuters and tied to policy risk for the automaker. The review could affect public procurement eligibility and access to strategic dual-use infrastructure if restrictions follow. BYD responded that vehicle and cloud data cannot be remotely accessed from China and stays under customer control. The request remains pending, leaving regulatory and market uncertainty for Chinese EV imports into Europe.

NHTSA's 'Recalls Next' Meeting Signals a New Era for OTA Software Fixes in Vehicle Safety

Chargenews | 06 Nov 2026, 12:00 SGT

NHTSA held its Recalls Next public meeting in Washington, D.C., on November 5, 2026, examining over-the-air software remedies and connected-vehicle tools to improve recall completion rates. The proceeding, docketed as NHTSA-2026-2014 with public comment open through December 5, 2026, signals a regulatory shift toward OTA fixes for software-defined vehicles. The change affects how automakers remediate defects and manage safety compliance across connected fleets. Industry participants have until the comment deadline to shape the framework before guidance or rulemaking follows.

Bosch Central Gateway: ciberseguridad para motos desde 2027

Nosolomotor | 05 Nov 2026, 23:05 SGT

Bosch unveiled a new generation of its Central Gateway at EICMA Milan, a control unit that filters all traffic entering the electronics of a connected motorcycle. It ships in 16, 39 and 99-pin variants and arrives ahead of mandatory cybersecurity requirements for new motorcycle models from 11 December 2027. The gateway targets the growing attack surface of connected bikes, where telematics and TFT displays expose CAN networks to remote threats. Manufacturers will need compliant filtering hardware to meet the regulatory deadline.

Cybersecurity Rules for Smart Vehicles: Protecting Against Malware Attacks (2026)

Vfw6110 | 05 Nov 2026, 22:00 SGT

India's road transport ministry proposed cybersecurity rules that would make malware protection and cyberattack resilience mandatory for certain categories of smart and connected vehicles. The rules target the growing attack surface created by autonomous driving features and always-on connectivity, with implications for both road safety and personal data privacy. If enacted, they would impose security requirements on vehicle categories sold in one of the world's largest automotive markets. The proposal signals a regulatory shift toward mandatory rather than voluntary vehicle cybersecurity controls.

DPA Magazine | JLR restarts manufacturing following cyber-attack

Dpaonthenet | 05 Nov 2026, 21:42 SGT

Jaguar Land Rover resumed phased manufacturing in October 2025 after a cyber incident in late August or early September halted production, restarting first at its Electric Propulsion Manufacturing Centre and Battery Assembly Centre in the West Midlands. The company also arranged a new financing solution to support cashflow for qualifying suppliers affected by the shutdown. The event illustrates the extended operational and supply-chain impact of ransomware-class attacks on OEMs, with recovery measured in weeks rather than days.

Second Strike: Ransomware Returns to the Same EV Maker, Now Locking the Vehicle Itself - Upstream

Upstream | 05 Nov 2026, 21:36 SGT

In late October 2026, owners of a popular Chinese EV model reported screens going dark, climate controls failing and vehicles refusing to start, followed by ransomware demands to restore access, marking a second strike on the same EV maker after a 2025 attack. Ransomware accounted for 44 percent of the 494 publicly reported automotive and smart mobility incidents in 2025, more than double 2024 volume, according to Upstream's 2026 Global Automotive Cybersecurity Report. The trend shows ransomware increasingly targeting vehicle dashboards and operational systems rather than just backend servers.

Can Your EV Battery Be Hacked? India's New BMS Cybersecurity Mandate (2026)

Wsiglobalnet | 05 Nov 2026, 20:54 SGT

India amended AIS-156-2020 to mandate cybersecurity testing of electric vehicle battery management systems, targeting wireless interfaces such as Bluetooth that could allow unauthorized devices to discover, connect to, and manipulate safety-critical BMS functions. The framework requires OEMs to demonstrate that unauthorized mobile applications or devices cannot access the BMS. The mandate raises the compliance bar for EV makers selling in India and treats battery management as a safety-critical attack surface rather than a convenience feature. Manufacturers must now build and evidence BMS access controls ahead of certification.

Baidu’s Apollo World simulates full robotaxi trips before global launches — Where’s the driver?

Wheresthedriver | 05 Nov 2026, 20:27 SGT

Baidu introduced Apollo World, an AI simulation system that generates up to 100,000 kilometres of virtual driving daily, equivalent to about three years of real-world testing with a safety driver. Baidu is using it to train and validate Apollo Go robotaxi strategies for international operations, though the company says road testing remains necessary. The system produces real-time camera images and LiDAR point clouds for interactive virtual traffic environments.

Connected Chinese Cars Could Pose Risks To UK Motorists

Petrolprices | 05 Nov 2026, 19:16 SGT

A House of Commons Business, Innovation and Trade Committee report warned that connected vehicles from Chinese manufacturers could be accessed, monitored, or remotely disabled, and urged the UK government to tighten oversight of data transmitted between vehicles and overseas companies. The report focuses on internet-connected cameras, microphones, sensors, and remote update channels in exported vehicles. It signals a regulatory push toward supply-chain scrutiny and data-flow controls for connected cars sold in the UK.

Normalización en ciberseguridad para la movilidad inteligente

Revista | 05 Nov 2026, 16:33 SGT

Spain's UNE published a standardization report on cybersecurity for connected and automated mobility, intended as a baseline for future standards work covering cooperative intelligent transport systems and vehicle-to-environment connectivity. The document consolidates input from sector experts and companies and responds to a rise in automotive cyberattacks exploiting vehicles' growing number of networked digital components. It is a standards and governance development rather than a specific vulnerability disclosure. The implication is that Spanish and EU stakeholders gain a reference framework to align future connected-vehicle security requirements.

Ransomware Detected: Five Star Plating targeted by thegentlemen

Dark Web Forum | 05 Nov 2026, 14:07 SGT

Five Star Plating is targeted by thegentlemen. Victim Description: fivestarplating.com Five Star Plating LLC is an American electroplating and metal finishing company founded in 2007 in Little Rock, Arkansas, with 82 employees and approximately 12.5 million dollars in annual revenue. It operates 3 automatic plating lines plus 1 manual rack line across two facilities, coating around 50 million parts per year. Its core offerings include zinc and zinc alloy plating, phosphate coatings, E-Coat electrocoating and specialty finishes like zinc-nickel as a cadmium replacement for aerospace and defense. The company serves automotive, oil and gas, construction, aerospace and military clients with ISO 9001 certification and salt spray testing capabilities up to 1,000 hours. Key strengths are full-spectrum plating from mass barrel to custom rack work, a dedicated testing laboratory and strategic location in central Arkansas. It is the largest specialized plater in the state with continued growth of 16 percent year over year. Victim's Country: US Discovered: 05 Nov 2026, 14:07 SGT.

South Korea probes connected-car risks, eyes restricting China-made vehicles - CHOSUNBIZ

Biz | 05 Nov 2026, 13:04 SGT

South Korea's Ministry of National Defense launched a survey of connected-car technology sold in the country and is weighing tiered restrictions on China-made connected vehicles entering military facilities. The assessment follows a National Assembly audit warning that such vehicles could transmit video, location, and other data collected inside military sites to external servers. The probe extends automotive cybersecurity into national security and supply-chain risk, potentially affecting market access for Chinese OEMs. Access standards for military facilities are expected to be defined based on the survey results.

RDW approves Tesla Assisted Driving name and 10 per cent speed margin | Volts & Bots

Voltsandbots | 05 Nov 2026, 10:00 SGT

The Netherlands' vehicle regulator RDW approved Tesla's request to rename FSD (Supervised) to Tesla Assisted Driving across 10 EU countries and to cap the system's speed margin at 10 percent, down from as much as 50 percent. The margin resets to 0 percent at each startup and other speed-related functions default to off. The decision reflects tightening European regulatory scrutiny of driver-assistance naming and speed behavior.

Waymo expands service to Torrance, El Segundo, Manhattan Beach - ABC7 Los Angeles

Abc7 | 05 Nov 2026, 09:11 SGT

Waymo expanded its driverless ride-hailing service to three South Bay communities in Los Angeles County, Torrance, El Segundo and Manhattan Beach, allowing residents to hail its robotaxis. The expansion extends Waymo's growing Southern California footprint across additional municipalities. It reflects the company's continued scaling of commercial driverless operations in dense, diverse urban markets.

NHTSA Floats Cyan Lights for Self-Driving Cars and Drops Manual-Control Rules for Robotaxis With No Steering Wheel

Theautowire | 05 Nov 2026, 09:08 SGT

NHTSA published a notice of proposed rulemaking to revise FMVSS 108, removing requirements that assume a human driver's hands and eyes and creating an optional cyan marker lamp indicating a vehicle is driving itself. The rule, docket NHTSA-2026-1519 with a 30-day comment period, does not name specific companies but primarily benefits robotaxi developers such as Tesla and Zoox building vehicles without steering wheels.

Look, no hands: Self-driving future comes to Switzerland - CGTN | Internationly

Internationly | 05 Nov 2026, 08:47 SGT

Chinese autonomous-driving technology is being tested in Switzerland, with self-driving electric cars carrying passengers on public roads in Zurich's Furttal region and driverless shuttle buses operating at Zurich International Airport. The IAMO pilot, launched for public use on September 28, uses three Nissan Ariya EVs with cameras, laser scanners and sensors serving nearly 100 stops across four municipalities with a safety operator aboard. The project marks a step in cross-border deployment of Chinese AV technology in European public transport.

CERT-In flags security vulnerabilities in specific versions of Tata Motors' connected vehicle apps - Asia Insurance Post

asiainsurancepost | 05 Nov 2026, 02:55 SGT

CERT-In flagged multiple vulnerabilities in specific versions of Tata Motors iRA 2.0 and iRA.ev connected vehicle applications, citing credential issues, inadequate URL validation, poor log management, and faulty SSL certificate implementation. The flaws could allow attackers to obtain sensitive credentials, access vehicle-related information, and impersonate users. CERT-In urged users to update to the latest app versions to mitigate the risk. The advisory underscores regulatory pressure on Indian automakers to secure connected vehicle software.

Europe's Cyber Resilience Act Puts Manufacturers on a 24 Hour Reporting Clock — Unsurfaced

Unsurfaced | 04 Nov 2026, 16:35 SGT

Since September 11, 2026, Article 14 of the EU Cyber Resilience Act (Regulation 2024/2847) obliges manufacturers of connected hardware and software sold in the EU to report actively exploited product flaws to authorities within 24 hours. This is the first obligation to take effect, with most of the regulation and its Article 64 fines applying from December 11, 2027. Automotive OEMs and suppliers shipping connected components into Europe now face a tight disclosure clock, requiring incident detection and reporting processes to be operational well ahead of the broader compliance deadline.

Eacon runs 60 autonomous electric haul trucks at 5,400m

Automotive World | 04 Nov 2026, 14:30 SGT

Eacon is operating 60 autonomous electric haul trucks at Zijin Mining's site at 5,400 meters altitude, addressing staffing shortages while cutting emissions. The deployment demonstrates autonomous haulage viability in extreme high-altitude mining conditions. It reinforces mining as a leading commercial segment for autonomous electric heavy vehicle adoption.

MAN and MVG move Munich autonomous bus into public trials

Automotive World | 04 Nov 2026, 14:15 SGT

MAN and Munich transport operator MVG moved their autonomous bus into public trials under the MINGA project in Munich. The trial reflects European OEMs and cities sharing risk in integrating autonomous buses into public transport. It advances driverless bus deployment from closed testing toward real passenger service in European cities.

EU: Commission Consults on Automated Vehicle Safety Draft | Obsidian

Obsidianri | 04 Nov 2026, 14:00 SGT

The European Commission opened public feedback on draft implementing regulation Ares(2026)10298442, which adapts General Safety Regulation (EU) 2019/2144 implementing acts so whole-vehicle type approval can cover fully automated vehicles in dual-mode and no-manual-driving configurations. Comments close December 1, 2026. The draft establishes an EU-wide approval pathway for fully automated vehicles, a prerequisite for scaling robotaxi and driverless deployments across member states.

BYD Shark 6 Hack Explained: Cybersecurity Concerns & Fixes for Electric Vehicles (2026)

Cegguam | 04 Nov 2026, 08:36 SGT

BYD is issuing a remote security update for its Shark 6 ute after researchers at Fortify Labs demonstrated physical access to the vehicle could be used to manipulate its infotainment system, as shown on the ABC Four Corners program. The flaw affects the Shark 6 infotainment head unit and its connected services. The over-the-air remedy shows how EV makers can respond quickly, but the incident raises questions about how deeply infotainment compromises can reach into vehicle functions. Owners should confirm the update is applied.

Intelligentcio | 02 Nov 2026, 23:00 SGT

Kodiak AI signed a binding agreement with California-based DTL Transport to deploy 75 autonomous trucks across major US freight corridors, with DTL owning and operating the vehicles and paying a per-mile technology fee for the Kodiak Driver system. Kodiak calls it the first publicly announced definitive commitment by an interstate freight carrier to integrate driverless trucks into its own fleet. Kodiak is also preparing driverless highway deliveries for IKEA.

India’s New Road Safety Rules: How Driving Licence Points System And 2027 ADAS Mandate Could Prevent Accidents

Bwautoworld | 02 Nov 2026, 15:00 SGT

India's Ministry of Road Transport and Highways has proposed a graded points system for driving licences alongside a 2027 mandate making ADAS and Driver Monitoring System features compulsory for commercial vehicles. The two policies are designed to work together to improve road safety, though their effectiveness depends on accurate in-cabin monitoring. The ADAS mandate would significantly expand the addressable market for driver-assistance technology suppliers in India's commercial vehicle segment.

Who Pays When a Robotaxi Crashes? The Liability Question Regulators Haven't Answered - BNO News

Bnonews | 02 Nov 2026, 13:18 SGT

NHTSA has expanded its preliminary evaluation of Waymo's automated driving system after incidents including collisions with stationary objects and erratic behavior near school buses, prompting software recalls. The article examines how robotaxi crashes shift liability from driver negligence toward product liability, which is costlier to litigate and requires technical evidence held only by manufacturers. This unresolved liability framework poses a significant risk for robotaxi operators and insurers as commercial deployment scales.

Ransomware Detected: Atlas Stamping Manufacturing targeted by thegentlemen

Dark Web Forum | 31 Oct 2026, 15:30 SGT

Atlas Stamping Manufacturing is targeted by thegentlemen. Victim Description: atlasstamping.com Atlas Stamping Manufacturing Corp. is a US metal stamping company founded in 1971 in Richardson, Texas, producing precision stamped parts for automotive, aerospace, electronics, medical and industrial customers. With around 50 to 200 employees and estimated revenue of 5 to 20 million dollars, it operates a full-service plant offering progressive and transfer die stamping, deep draw, forming, welding and assembly. Its own tool and die shop designs and maintains all stamping dies in-house, giving full control over quality and lead times. Press capabilities range from 30 to 400 tons handling materials from thin foil to quarter-inch thick steel, aluminum and specialty alloys. The company has served the Dallas-Fort Worth industrial market for 54 years with ISO 9001 quality systems and PPAP compliance for OEM clients. Victim's Country: US Discovered: 31 Oct 2026, 15:30 SGT.

Connected vehicle vulnerabilities increasingly stem from external cloud services, researchers find - https://streamlinefeed.co.ke/

httpsstreamlinefeedcoke | 30 Oct 2026, 19:42 SGT

Researchers found that connected vehicle vulnerabilities increasingly originate in external cloud services and backend APIs rather than in the vehicles themselves. The findings affect telematics platforms and cloud-dependent connected-car features across multiple automakers. Because cloud backends often expose vehicle control and data functions, weaknesses there can scale across entire fleets. The implication is that OEMs must extend security testing and monitoring to third-party cloud infrastructure and API integrations.

Government launches consultation on improving EV charger cybersecurity - Express and Star

expressandstar | 30 Oct 2026, 18:16 SGT

The UK government launched a consultation on improving cybersecurity for public electric vehicle charge points. The Department for Transport identified risks including direct attacks on chargers and manipulation of charge points to compromise other parts of the charging network. The consultation affects public EV charging infrastructure operators and manufacturers across the UK. It signals forthcoming regulatory requirements for charger security, and stakeholders face a deadline to respond before rules are finalized.

Kodiak lands first commercial deal to supply driverless trucks for public highways - TechCrunch

techcrunch | 28 Oct 2026, 21:00 SGT

Kodiak Robotics secured its first commercial agreement to supply driverless trucks for public highway operations, marking a transition from testing to revenue-generating autonomous freight. The deal positions Kodiak as an early commercial player in long-haul autonomous trucking, a segment racing toward driver-out operations on US highways.

Tesla Adds 29 More Cybercabs, Expanding Texas Robotaxi Fleet to 1,080 - Drive Tesla Canada

driveteslacanada | 28 Oct 2026, 20:54 SGT

Tesla added 29 Cybercabs to its Texas robotaxi fleet, bringing the total to 1,080 vehicles. The expansion reflects Tesla's accelerating deployment of purpose-built autonomous vehicles in the state. The growing fleet scale positions Tesla to compete more directly with Waymo's commercial robotaxi operations.

Affected Vehicle Make & Model: Tesla, Cybercab

Colmobil cyberattack exposes vulnerabilities in Israel’s connected-car ecosystem

Calcalistech | 28 Oct 2026, 17:36 SGT

Colmobil reported it resolved a cybersecurity incident affecting its operations, with systems gradually restored and full service including maintenance, software updates, and support resuming at service centers. The company stated the incident was unrelated to vehicles' own systems, indicating the compromise was confined to corporate or dealer IT rather than embedded automotive systems. The event nonetheless exposed vulnerabilities in Israel's connected-car ecosystem, and the distinction between IT and vehicle-system impact is a key factor for assessing downstream safety and regulatory exposure.

Software-defined vehicles seen as major cyberattack target - Automotive News

Automotive News | 27 Oct 2026, 19:16 SGT

A survey of automotive professionals found that most expect software-defined vehicles to become cyberattack targets within three years, citing the consolidation of infotainment and safety software onto a single computer as a core risk. The architecture in question underpins next-generation SDV platforms from automakers and suppliers such as Continental. Because safety-critical and consumer-facing functions share compute, a single compromise could affect both. The finding implies that OEMs face pressure to harden domain controllers and segment safety software before SDV fleets scale.

Tesla Cybercabs and Robotaxis Turn Out in Force at Austin F1 Grand Prix - Drive Tesla Canada

driveteslacanada | 26 Oct 2026, 22:32 SGT

Tesla displayed Cybercabs and robotaxis in large numbers at the Austin F1 Grand Prix, showcasing its autonomous vehicle lineup at a high-visibility public event. The presence promoted Tesla's robotaxi ambitions in the city where it operates a driverless ride-hailing service. The marketing push comes as Tesla works to build public awareness and confidence in its autonomy technology.

NHTSA deadlines on Tesla's robotaxi pile up just as Waymo pulls ahead - Startup Fortune

startupfortune | 26 Oct 2026, 22:02 SGT

Tesla faces mounting NHTSA regulatory deadlines related to its robotaxi program while Waymo continues to widen its lead in commercial driverless operations. The federal safety agency's inquiries add compliance pressure on Tesla as it scales its Austin-based robotaxi service. The contrast underscores Waymo's operational head start over Tesla in fully driverless deployment.

USDOT maps the road ahead for autonomous trucks - TheTrucker.com

Thetrucker | 26 Oct 2026, 21:00 SGT

The U.S. Department of Transportation unveiled its National Strategy for Automated Vehicles on September 3, 2026, setting priorities for fiscal years 2026 through 2030. The plan targets safety, regulatory certainty, commercial deployment and consistent cross-state operation, with details to be resolved through rulemakings and guidance. The strategy signals federal intent to expand automated freight trucking on U.S. highways.

Tesla app code hints owners could add their own cars to the Robotaxi network - Drive Tesla Canada

driveteslacanada | 23 Oct 2026, 09:22 SGT

Code in Tesla's app suggests owners may be able to add their personal vehicles to the Robotaxi network. The feature would enable a crowdsourced Tesla fleet model, potentially scaling robotaxi supply rapidly but raising questions about liability, insurance, and vehicle readiness standards.

Volvo Autonomous Solutions, Waabi launch first driverless lane in Texas - Trucking Dive

truckingdive | 23 Oct 2026, 02:56 SGT

Volvo Autonomous Solutions and Waabi have launched the first driverless commercial lane in Texas, according to Trucking Dive. The partnership deploys autonomous Class 8 trucks on a defined freight corridor, marking a milestone for driverless heavy trucking. It advances commercial autonomous freight in a state with established AV-friendly regulation.

Tesla in Full Self-Driving mode fatally struck man crossing I-80 - Mezha.net

mezha | 23 Oct 2026, 02:16 SGT

A Tesla operating in Full Self-Driving mode struck and killed a pedestrian crossing Interstate 80, marking a fatal incident involving the company's advanced driver assistance system. The event implicates Tesla's FSD software and raises questions about the system's ability to detect and respond to pedestrians in highway environments. The fatality intensifies regulatory and legal scrutiny of Tesla's driver assistance technology, which remains classified as a Level 2 system requiring driver supervision. Investigators and regulators are likely to examine the crash data to determine whether FSD contributed to the failure to avoid the pedestrian.

Affected Vehicle Make & Model: Tesla

Bill aims to study how self-driving vehicles can be integrated into Illinois transit - Capitol News Illinois

capitolnewsillinois | 22 Oct 2026, 23:46 SGT

Illinois lawmakers introduced a bill to study how self-driving vehicles could be integrated into the state's public transit systems. The legislation would direct research into AV use for transit rather than immediate deployment. It signals growing state-level interest in framing autonomous technology as a complement to public transportation rather than only private robotaxi service.

LONDON ROBOTAXI TRIALS FACE BACKLASH AS DRIVERS PROTEST OVER SAFETY AND JOB FEARS - PHTM

phtm | 21 Oct 2026, 22:55 SGT

London robotaxi trials are drawing protests from drivers citing safety and job-loss concerns. The backlash signals organized resistance to autonomous deployment in the UK capital, where ride-hail drivers see robotaxis as a direct threat to livelihoods and are pressing regulators before wider commercial rollout.

Tesla Cybercab hits pothole in Austin, raising questions about sensors - Austin American-Statesman

austinamericanstatesman | 21 Oct 2026, 18:10 SGT

A Tesla Cybercab test vehicle struck a pothole on Austin streets, prompting scrutiny of the robotaxi prototype's sensor suite and perception capabilities. The incident raises questions about Tesla's camera-only approach to autonomy as it prepares to launch commercial robotaxi operations in Texas, where safety validation remains a key regulatory and public trust concern.

Affected Vehicle Make & Model: Tesla, Cybercab

Germany Mandates Tesla to Rename 'Full Self-Driving' to 'Assisted Driving' - PravdaReport

pravdareport | 21 Oct 2026, 15:05 SGT

German regulators required Tesla to rename its Full Self-Driving feature to Assisted Driving, ruling the original branding misrepresents the system's actual capabilities. The action reflects growing European regulatory pressure on Tesla's marketing of driver assistance technology and sets a precedent for stricter labeling enforcement across the EU.

Affected Vehicle Make & Model: Tesla

What are those baby-blue robotaxis? What to know about Waymo’s S.A. expansion - San Antonio Express-News

sanantonioexpressnews | 21 Oct 2026, 04:49 SGT

Waymo is expanding its robotaxi service to San Antonio, Texas, deploying its baby-blue vehicles in the city. The expansion adds another Texas market to Waymo's growing U.S. footprint, where it already operates in Austin, and reflects the company's strategy of scaling driverless ride-hailing across the state.

Discovery of cross-domain cyberattack risk targeting electric vehicle charging navigation systems

Techxplore | 21 Oct 2026, 02:40 SGT

Researchers at Hong Kong Polytechnic University identified a cross-domain cyberattack risk in electric vehicle charging navigation systems, where manipulation of charging route or station data can propagate between transportation and power systems. The flaw affects EV charging navigation and the integration layer linking charging services to grid infrastructure. As EV adoption grows, such cross-domain attacks could disrupt charging availability or grid load balance. The findings call for hardened validation of charging data and secure system integration before broader deployment.

Zoox Can Start Charging For Steering Wheel-Free Robotaxis In Las Vegas - Motor1.com

motor1 | 19 Oct 2026, 15:36 SGT

Zoox received approval to begin charging passengers for rides in its steering wheel-free robotaxis in Las Vegas. The Amazon-owned company's purpose-built vehicle operates without traditional driving controls, making it one of the first paid services of its kind in the US. Commercial launch in Las Vegas positions Zoox to compete with Waymo and Tesla in the emerging robotaxi market.

London's new self-driving taxis spark safety and traffic concerns - Autocar

autocar | 19 Oct 2026, 15:01 SGT

London's newly introduced self-driving taxis have drawn safety and traffic concerns from critics following their deployment in the UK capital. The pushback reflects broader tensions as robotaxi operators expand into European cities where regulators and residents are weighing autonomous vehicle benefits against road safety risks.

Waymo vehicles hit Toronto streets as Canada entry begins

Automotive World | 19 Oct 2026, 12:56 SGT

Waymo began operating vehicles on Toronto streets, marking its entry into Canada, starting with high-definition mapping and supervised testing before fully autonomous rides. The expansion extends Waymo's robotaxi footprint beyond the US into a new national market. It positions Toronto as an early Canadian AV deployment city and tests Waymo's mapping and regulatory approach in a different jurisdiction.

ARAI becomes India’s first test agency to offer full vehicle cybersecurity testing and homologation - Motorindia

motorindia | 15 Oct 2026, 19:12 SGT

The Automotive Research Association of India (ARAI) became the country's first test agency to offer comprehensive vehicle cybersecurity testing and homologation services. This capability supports India's automotive industry, including connected and autonomous vehicle developers, by providing a domestic pathway to certify compliance with emerging cybersecurity regulations such as UN R155.

Which States Allow Self-Driving Trucks on the Road in 2026? - Tech.co

tech | 15 Oct 2026, 17:45 SGT

Tech.co published an overview of which US states permit self-driving trucks on public roads in 2026. The patchwork of state-level rules remains a key constraint on autonomous freight deployment, shaping where trucking developers can commercially operate.

Cybersecurity of over-the-air update mechanisms for vehicles

Kaspersky ICS CERT | 15 Oct 2026, 17:00 SGT

A technical analysis examines cybersecurity risks in over-the-air update mechanisms for vehicles, noting that more than 100 ECUs per modern car and growing OTA capability create expanding attack surfaces. SBD Automotive forecasts OTA-capable vehicles in the US, EU, and China will more than triple to 30-40 percent of the fleet within a decade, making update security a core AV and software-defined vehicle concern.

Venti Autonomous Truck Fleet Set for U.S. Rail Yard - Fleet Equipment Magazine

fleetequipmentmagazine | 14 Oct 2026, 22:23 SGT

Venti is deploying an autonomous truck fleet at a U.S. rail yard, targeting freight movement between rail and road transport. The deployment applies driverless trucking to a contained, repetitive logistics environment. It reflects the industry's shift toward yard and short-haul autonomy as a nearer-term commercial path than long-haul highway operations.

AI-driven cyber threats raise stakes for Canadian dealers - Canadian Auto Dealer

Canadianautodealer | 14 Oct 2026, 01:43 SGT

Canada's Canadian Centre for Cyber Security warned that frontier AI models let cybercriminals identify and exploit software flaws and weak security controls faster, potentially cutting defender response time from days or weeks to hours. The warning targets Canadian auto dealers, whose connected sales, financing, and dealership management systems hold sensitive customer data. Dealerships face elevated ransomware and data breach risk if detection and patching cycles are not accelerated. The agency's guidance implies dealers must shorten incident response timelines and harden exposed systems against AI-assisted attacks.

Ransomware Detected: IGPL targeted by HYFLOCK

Dark Web Forum | 14 Oct 2026, 01:14 SGT

IGPL is targeted by HYFLOCK. Victim Description: Company Profile & Core Business Overview: Established in 1988 and headquartered in Mumbai, India, IGPL operates its core manufacturing facility within the Taloja chemical industrial corridor in Maharashtra. The company is a publicly traded, international petrochemical products manufacturer listed on both the National Stock Exchange of India (NSE) and the Bombay Stock Exchange (BSE). Core Products: The company primarily specializes in the production of Phthalic Anhydride (PAN). Leveraging economies of scale, it also recovers valuable by-products such as Maleic Anhydride and Benzoic Acid, and further extends its downstream value chain to manufacture plasticizers like Di-Ethyl Phthalate (DEP). Industry Influence Market Dominance: IGPL stands as India's largest single-site Phthalic Anhydride (PAN) producer, commanding a massive domestic market share of approximately 50%. Its Taloja complex is also recognized as one of the largest single-location PAN manufacturing facilities globally, boasting an annual production capacity of 270,000 Metric Tonnes Per Annum (MTPA). Critical Supply Chain Link: Phthalic Anhydride serves as an indispensable chemical intermediate in the industrial value chain. IGPL's products are widely supplied to leading global and domestic manufacturers across dozens of backbone industries, including paints, coatings, plastics, flexible PVC, unsaturated polyester resins (UPR), automotive components, construction chemicals, and fragrances. Beyond dominating the Indian market, the company exports to international markets, exerting a strong global supply chain presence. Financial Performance & Annual Revenue According to the latest financial disclosures: Annual Revenue: IGPL's annual total revenue consistently ranges between INR 20.7 billion and INR 22.3 billion (approximately USD 210 million to USD 270 million). Recent Revenue Trends: As of 2026, its trailing twelve months (TTM) rolling total revenue sits at approximately INR 20.73 billion (around USD 247 million). The company's top-line performance exhibits cyclical patterns, highly influenced by fluctuations in international chemical raw material prices (specifically Orthoxylene) and global supply chain demand. Profitability: The company has maintained a net profit margin of around 3.94% over the past 12 months, with its current market capitalization valued between INR 17.4 billion and INR 17.6 billion. Victim's Country: NG Discovered: 14 Oct 2026, 01:14 SGT.

LTA pauses pilot for self-driving public buses, will consider use for more targeted commuter groups first - Mothership

mothership | 13 Oct 2026, 18:17 SGT

Singapore's Land Transport Authority paused its self-driving public bus pilot and will instead evaluate autonomous vehicles for more targeted commuter groups. The decision signals that full-scale driverless public bus deployment faces operational and regulatory hurdles before broader rollout in Singapore.

Malaysia suspends sale of Chery Omoda 5 after viral incident; Singapore cars not affected

The Straits Times | 12 Oct 2026, 13:45 SGT

Malaysia's Road Transport Department suspended new registrations of the Chery Omoda 5 and temporarily rescinded its type approval after a rear suspension failure in Johor Bahru where both wheels detached. Chery Auto Malaysia recalled the Omoda 5 C and H variants on Oct 11, offering inspections and possible parts replacement, marking the model's second recall in two years after a May 2024 incomplete weld case. The incident affects vehicle structural safety certification and type approval processes for Chinese-made vehicles entering Southeast Asian markets. Singapore is unaffected since the Omoda 5 is not sold there, while Malaysian authorities continue investigating production and supplier quality controls.

Affected Vehicle Make & Model: Chery, Omoda 5

Tesla Robotaxi App 26.8.3 Now Live on iOS - BASENOR

basenor | 10 Oct 2026, 05:03 SGT

Tesla released version 26.8.3 of its Robotaxi app on iOS, expanding mobile access to its ride-hailing service. The app update signals Tesla is continuing to build consumer-facing infrastructure for its autonomous ride-hail ambitions even as its robotaxi operations remain limited to select markets.

Affected Vehicle Make & Model: Tesla, Robotaxi

Tesla renames ‘Full Self-Driving’ to ‘Tesla Assisted Driving’ in Europe - TechCrunch

techcrunch | 10 Oct 2026, 00:07 SGT

Tesla renamed its Full Self-Driving feature to Tesla Assisted Driving in Europe, reflecting regulatory pressure on marketing terminology for driver-assistance systems. The change signals tightening European scrutiny of autonomy claims and could affect how Tesla positions its ADAS products across the region.

Is Slovakia's FSD Nod the Next Step in Tesla's European Expansion? - Yahoo Finance UK

yahoofinanceuk | 09 Oct 2026, 19:27 SGT

Slovakia has signaled a regulatory nod for Tesla's Full Self-Driving system, potentially opening a Central European market for the supervised driver-assistance software. The move matters because Tesla is pursuing a country-by-country approval strategy in Europe, where FSD remains far less widely authorized than in North America.

Tesla Now Has Nearly 200 Cybercabs in Houston as Testing Ramps Up - Drive Tesla Canada

driveteslacanada | 08 Oct 2026, 00:36 SGT

Tesla has deployed nearly 200 Cybercab vehicles in Houston as part of expanded autonomous testing operations. The Cybercab is Tesla's purpose-built robotaxi without a steering wheel or pedals. The scale of deployment in Houston marks a significant ramp-up of Tesla's robotaxi testing ahead of planned commercial service launches.

Nissan UK launches first ‘real-world’ driverless pilot

WardsAuto | 08 Oct 2026, 00:10 SGT

Nissan UK launched its first real-world driverless pilot as part of a government-funded research project originating at the University of Warwick. The initiative aims to deploy an autonomous mobility service across the United Kingdom, marking a significant step in commercializing driverless technology on British public roads.

Driverless cars hit the streets of downtown Detroit as Waymo begins its fully autonomous phase - WXYZ 7 News Detroit

wxyz7newsdetroit | 07 Oct 2026, 23:56 SGT

Waymo launched fully autonomous driverless operations in downtown Detroit, removing safety drivers from its vehicles in the city. Detroit becomes one of the few major US cities where Waymo operates without human backup. The expansion into a legacy automotive hub demonstrates Waymo's confidence in handling complex urban environments including winter weather.

Robotaxis in 2026: How Driverless Car Technology Is Advancing - The Daily Flare

Thedailyflare | 07 Oct 2026, 23:49 SGT

Amazon-owned Zoox began paid robotaxi rides in Las Vegas on 10 August 2026 using custom-built vehicles with no steering wheel or pedals, operating roughly 100 vehicles across four U.S. cities. NHTSA granted Zoox a temporary exemption from eight federal motor vehicle safety standards on 30 July 2026, the first such U.S. approval for a steering-wheel-free paid robotaxi, capped at 2,500 vehicles per 12-month period.

Affected Vehicle Make & Model: Tesla, Cybercab

No cap on autonomous vehicles given growing transport needs: Jeffrey Siow

The Business Times | 07 Oct 2026, 20:17 SGT

Singapore Minister for Transport Jeffrey Siow said the country will not cap autonomous vehicle numbers because transport demand is still growing, and that AVs remain a very small share of active taxi and private-hire drivers. The statement comes as Singapore begins AV ride-hailing deployments, with Waymo set to test its self-driving vehicles locally.

Email phishing tops dealership cybersecurity threats, CDK Global finds - CBT News

cbtnews | 07 Oct 2026, 18:00 SGT

CDK Global research identifies email phishing as the leading cybersecurity threat facing automotive dealerships. The finding covers dealership networks and the customer and financial data they hold, including DMS-connected systems. Dealerships remain a soft target because staff handle high volumes of external email and payment traffic. The report implies dealers need stronger email filtering and employee awareness controls rather than relying on perimeter defences alone.

Tesla is browbeating the EU to approve its ‘Full Self-Driving’ tech. The pressure is working. - Reuters

reuters | 07 Oct 2026, 14:13 SGT

Tesla is pressuring European Union regulators to approve its Full Self-Driving technology for public roads, and the lobbying effort is gaining traction. The EU currently requires more rigorous safety validation than US regulators for automated driving features. Approval would open a major market for Tesla's FSD and set a precedent for AV regulation across Europe.

Linux Foundation sets common automotive SBOM framework

Automotive World | 07 Oct 2026, 12:50 SGT

The Linux Foundation has published a common automotive SBOM framework intended to standardise how software bills of materials are structured and exchanged across the vehicle supply chain. The framework targets automakers, tier-one suppliers, and software vendors managing increasingly complex connected-vehicle codebases. Adoption would improve vulnerability traceability and incident response when flaws are found in embedded components. The effort is voluntary guidance rather than a regulatory mandate, so its impact depends on industry uptake.

Another autonomous trucking company hits the road between Houston and Dallas - Axios

axios | 06 Oct 2026, 02:23 SGT

An autonomous trucking company began driverless freight runs on the Houston to Dallas corridor in Texas, adding to the growing number of AV truck operators on that route. The deployment advances commercial middle-mile autonomy in a key Sun Belt logistics lane.

The technology of the robotaxi ...

Eenewseurope | 05 Oct 2026, 22:44 SGT

Wayve launched a commercial robotaxi trial with Uber in London using electric Ford Mustang Mach-E vehicles equipped with the Wayve AI Driver and a safety driver, with riders able to select autonomous journeys via a 64-language interactive screen. London's congestion and pedestrian complexity make it a critical test market as operators target commercial driverless services by end of 2026.

Chinese EV influx into Canada reportedly raises national security, data privacy concerns | International

Devdiscourse | 04 Oct 2026, 16:48 SGT

Canada's tariff reduction on Chinese electric vehicles has prompted national security and data privacy warnings over connected EV data collection. Cameras, microphones, and location systems in these vehicles could capture sensitive information, with experts flagging potential risks to critical infrastructure. The US Department of Energy's Vehicles-to-Grid Integration Assessment Report from January 2025 identified related cybersecurity vulnerabilities in V2G systems. No specific vulnerability or patch was named, leaving the regulatory and threat posture unresolved.

AutoSens 2026: Regulation Drives Automotive Sensing Architectures- EE Times

Eetimes | 02 Oct 2026, 23:58 SGT

At AutoSens Europe, Microchip demonstrated its Trust Shield TS1800 and TS50x Platform root of trust controllers, which use an Arm Cortex-M4F processor to run lattice-based post-quantum cryptographic algorithms and monitor flash memory in real time to block firmware tampering. The development responds to the European Cyber Resilience Act, which imposes cybersecurity baselines, vulnerability patching, and hardware secure-boot requirements on digital products sold in Europe, alongside NSA CNSA 2.0 mandates for post-quantum migration. For automotive suppliers, the shift means secure boot and quantum-resistant cryptography are becoming compliance obligations rather than optional features. Hardware-anchored trust in silicon is emerging as the practical path to meeting both regimes.

Tesla Gets Approval For Self-Driving System In Croatia - connectingregion.com

connectingregion | 02 Oct 2026, 06:33 SGT

Tesla received approval to operate its self-driving system in Croatia, marking another European market entry for the company's driver-assistance and autonomous driving technology. The approval expands Tesla's regulatory footprint in the EU, where member states are progressively establishing frameworks for automated vehicle deployment.

Minneapolis council approves robotaxi regulation, mayor pledges veto - MPR News

mprnews | 01 Oct 2026, 17:00 SGT

The Minneapolis City Council approved robotaxi regulations, but the mayor pledged to veto the measure, creating uncertainty over how autonomous ride-hailing vehicles will be governed in the city. The dispute reflects broader tensions between municipal authorities and AV operators over permitting, safety oversight, and local control.

Automated Mobility: A Groundbreaking Global Regulation Changes the Game

Utac | 01 Oct 2026, 17:00 SGT

UNECE's WP.29 forum adopted a global regulation in June 2026 establishing the first international framework for Automated Driving Systems covering driverless vehicles. The regulation provides manufacturers with harmonized safety and approval standards across participating countries, potentially accelerating cross-border AV deployment and reducing fragmented national certification requirements.

Dealership cyberattacks keep climbing - Canadian Auto Dealer

Canadianautodealer | 30 Sep 2026, 22:26 SGT

Proton Dealership IT and Cybersecurity reported that cyberattacks against automotive dealerships in the U.S. and Canada remained elevated from July 2025 through June 2026, with a sharp spike in early 2026 linked to an attack involving remote-connectivity software. The data covers Proton clients, a dealership IT provider acquired by Reynolds and Reynolds in 2022, and shows attack volumes roughly double pre-incident baselines even during lulls. The trend exposes dealership networks and the customer and financial data they hold as a persistent weak point in the automotive supply chain. No specific patch or remediation is cited, indicating an ongoing threat that dealers must address through hardened remote-access controls.

Tesla receives approval to roll out self-driving software in Croatia - Reuters

reuters | 29 Sep 2026, 17:16 SGT

Tesla received regulatory approval to roll out its self-driving software in Croatia, expanding the geographic footprint of its FSD system across Europe. The approval marks another incremental step in Tesla's piecemeal European market expansion amid ongoing scrutiny of its driver-assistance technology.

Times Car confirms data breach affecting 6.6 million user accounts

BleepingComputer | 29 Sep 2026, 04:31 SGT

Japanese car-sharing operator Times Car confirmed a cyberattack that compromised roughly 6.6 million user accounts, with the breach disclosed in late September. The incident affects the company's customer account database rather than vehicle control systems, exposing personal data tied to its shared mobility platform. The scale of the compromise makes it one of the larger automotive-adjacent data breaches reported in Japan, raising identity theft and account takeover risks for users. Times Car has not disclosed whether a ransom demand was involved, and the investigation into the intrusion vector remains ongoing.

Electric CV Cybersecurity: How One Hack Can Expose ...

Autocarpro | 28 Sep 2026, 16:00 SGT

A compromised electric commercial vehicle charging station could be leveraged to access vehicle data or manipulate charging and payment parameters, according to analysis of EV charging infrastructure risk. The exposure spans charging management systems, backend payment platforms, and the vehicle-to-charger communication link used by electric commercial fleets. Because charging sessions often carry payment credentials and telematics data, a single compromised station can cascade into fleet-wide operational and financial impact. The finding underscores the need for hardened authentication and monitoring across public charging networks as electric CV adoption grows.

Grupo MARSAN is targeted by thegentlemen. Victim Description: grupomarsan.com zoominfo.com/c/grupo-marsan/460771135 Grupo Marsan is a Spanish Tier 2 automotive supplier founded in 1951 in Vigo, Spain, specializing in industrial surface coatings cataphoresis (e-coating), powder and liquid painting plus metal stamping, assembly, and JIT logistics, with a capacity of 300,000 parts per day. The company operates plants in Spain (Vigo, Zaragoza), Portugal, and Mexico, and also builds and runs dedicated in-house coating lines inside clients' facilities, supported by its own technology center M-Tech. It works under IATF automotive quality standards within supply chains of major OEMs and Tier 1 suppliers. After a liquidity crisis in 2024, the group was recapitalized with private and Galician public funds (~47.5% held by Xesgalicia and Vigo Activo), and Marcos Oubia was appointed CEO. FY2024 revenue exceeded 28 million with ~450 employees, and in 2025 the company acquired KATA Aragn, growing to ~500 employees Victim's Country: MX Discovered: 26 Sep 2026, 16:46 SGT.

Ransomware Detected: ENKEI******* targeted by thegentlemen

Dark Web Forum | 26 Sep 2026, 16:43 SGT

ENKEI******* is targeted by thegentlemen. Victim Description: This company specializes in manufacturing light-alloy aluminum wheels for automakers that is, it supplies factory rims for new cars rather than selling to retail consumers. It is the U.S. production arm of a major Japanese group, a global leader in this industry, with a casting plant in the American Midwest and its own in-house die-making capability. Its main clients are large car manufacturers (mass-market Japanese brands and new EV makers), with products going straight to vehicle assembly lines. The business is currently undergoing restructuring: part of its capacity is being shut down due to labor shortages and high operating costs, with production being consolidated at a single plant. Victim's Country: Unknown Discovered: 26 Sep 2026, 16:43 SGT.

Tesla Full Self-Driving release in the EU gets delayed - Teslarati

teslarati | 26 Sep 2026, 09:03 SGT

Tesla's planned Full Self-Driving release in the European Union has been delayed, pushing back the company's timeline for expanding its driver-assistance software into the bloc. The postponement affects Tesla's European market strategy and leaves EU regulators still evaluating the system's safety and compliance.

Senators delay vote on permanent Chinese car ban bill

Automotive World | 25 Sep 2026, 19:23 SGT

US Senators Bernie Moreno and Elissa Slotkin delayed a fast-track vote on the Connected Vehicle Security Act, which would permanently ban Chinese connected vehicles and related software and hardware from the US market. The delay, pushed past Trump's summit with Xi Jinping, came as Senator Rand Paul blocked unanimous consent. The bill would codify Biden-era restrictions covering imports, manufacturing, sales, and joint ventures.

Waymo begins offering driverless freeway rides in Austin - KEYE

keye | 24 Sep 2026, 11:52 SGT

Waymo has begun offering driverless freeway rides in Austin, Texas, expanding its robotaxi service beyond surface streets to include highway routes. The Alphabet-owned company is operating the freeway service without a human safety driver in the vehicle. This marks a significant operational milestone as freeway driving presents higher speeds and more complex merging scenarios than urban streets.

Gloria still backs deployment of robotaxis in San Diego despite city council’s opposition - San Diego Union-Tribune

sandiegouniontribune | 24 Sep 2026, 06:18 SGT

San Diego Mayor Todd Gloria reaffirmed support for robotaxi deployment in the city despite opposition from the San Diego City Council. The dispute reflects growing friction between local officials over autonomous vehicle policy as operators seek to expand into California markets beyond San Francisco and Los Angeles.

Tesla's supervised self-driving system often misreads speed limits, Belgian safety group finds

Channel NewsAsia | 24 Sep 2026, 06:03 SGT

Belgian road-safety group Johanna.be tested Tesla's supervised Full Self-Driving system over three days and roughly 400 km in July, finding it frequently exceeded speed limits in 20 km/h and 30 km/h zones and displayed incorrect higher limits to drivers. The system also attempted to overtake cyclists on streets where such manoeuvres are prohibited. Dutch regulator RDW approved FSD in April, with Belgium and other countries following, and an EU-wide vote was scheduled for October 6. The findings feed into ongoing European regulatory scrutiny of automated driving system safety and speed-limit compliance.

Affected Vehicle Make & Model: Tesla

Car Hacking Fears: Concern Regardless of Origin | Mirage News

Miragenews | 23 Sep 2026, 13:00 SGT

A cybersecurity expert gained control of a BYD Shark 6 hybrid ute's locks, headlights, and audio and video systems, describing the effort as easier than expected, according to an ABC report. The incident raises concerns that connected vehicles from BYD and other Chinese manufacturers may transmit audio, video and location data to the Chinese government. Australia's eSafety Commissioner has flagged connected vehicles as technologies enabling coercive control through trip histories, geolocation tracking and remote functions like doors, climate controls and horns. The case underscores unresolved data governance and remote-access risks across connected vehicle platforms.

Hyundai sees growth in hybrids, robotaxis and physical AI

WardsAuto | 21 Sep 2026, 23:58 SGT

Hyundai Motor Group outlined hybrid, robotaxi, and physical AI growth plans at its CEO Investor Day, tying recent technology investments to more profitable vehicle production. The strategy signals Hyundai's intent to commercialize autonomous mobility services alongside its electrified lineup, positioning the automaker as a vertically integrated player in both robotaxi deployment and AI-driven vehicle software.

Czech Republic Reverses Course, Grants Provisional Approval to Tesla's Full Self-Driving - finance.biggo.com

financebiggo | 21 Sep 2026, 22:35 SGT

The Czech Republic reversed its earlier position and granted provisional approval to Tesla's Full Self-Driving system. The regulatory shift allows Tesla to expand FSD testing and deployment in the Czech market, reflecting evolving European regulatory attitudes toward advanced driver assistance and autonomous driving technology.

Tesla FSD passes 160 million km in Australia and New Zealand, with 40% fewer reported collisions - driveteslacanada.ca

driveteslacanadaca | 21 Sep 2026, 21:12 SGT

Tesla's Full Self-Driving system surpassed 160 million kilometers driven in Australia and New Zealand, with 40 percent fewer reported collisions compared to human-driven vehicles. The data provides real-world safety evidence for FSD in right-hand-drive markets and supports Tesla's case for regulatory expansion across the Asia-Pacific region.

Waymo's driverless cars learn to navigate Las Vegas traffic one cautious swerve at a time

Lasvegassun | 21 Sep 2026, 17:00 SGT

Waymo launched its fully autonomous robotaxi service in Las Vegas on Sept. 14, 2026, using its Ojai robotaxi platform. The company is refining vehicle behavior in dense Las Vegas traffic through cautious navigation. The launch expands Waymo's commercial driverless footprint into a new major U.S. market.

[PDF] Target-Adaptive CAN Intrusion Detection Across Heterogeneous ...

Preprints | 18 Sep 2026, 14:00 SGT

A research paper presents target-adaptive CAN intrusion detection designed for heterogeneous vehicle networks, alongside a comprehensive review of CAN bus security covering vulnerabilities, cryptographic defenses, and IDS countermeasures. The work also describes a lightweight voltage-based ECU fingerprinting technique for identifying individual electronic control units on the bus. CAN remains the dominant in-vehicle protocol, so weaknesses there expose steering, braking, and powertrain functions across most production vehicles. The research implies that detection models must adapt per vehicle architecture rather than rely on a single generic signature set.

A Waymo self-driving car malfunctioned during flooding in Phoenix, nearly causing a crash as it struggled with standing water on the roadway. The incident raises questions about AV sensor performance and decision-making in extreme weather, a known limitation for autonomous systems operating in flood-prone regions.

Washington man jumps in front of a Tesla Cybercab to see how well the self-driving car operates in random real-world situations - supercarblondie.com

supercarblondie | 17 Sep 2026, 17:38 SGT

A man in Washington state deliberately jumped in front of a Tesla Cybercab to test how the self-driving vehicle responds to unpredictable real-world pedestrian behavior. The stunt underscores the challenge autonomous vehicles face in handling erratic human actions, a key safety validation hurdle for Tesla's robotaxi deployment.

Quantitative Analysis of Vulnerabilities in Cloud-Native OTA Pipelines for Software-Defined Vehicles

Automotive IQ | 16 Sep 2026, 21:20 SGT

A quantitative analysis of cloud-native OTA pipelines for software-defined vehicles finds that the greatest security risk lies upstream in cloud infrastructure that builds, signs, and distributes software, not in embedded vehicle systems. The study urges automakers to harden CI/CD orchestration, artifact management, and campaign backend services to satisfy UNECE R155/R156 and ISO 24089 requirements. The finding shifts automotive cybersecurity investment toward the software supply chain.

EU Cyber Resilience Act Explained for Automotive: What Changes for Connected Vehicles?

Automotive IQ | 16 Sep 2026, 21:19 SGT

The EU Cyber Resilience Act, a horizontal cybersecurity regulation for hardware and software products with digital elements, entered into force and makes cybersecurity a baseline requirement for products sold on the EU market. For automotive, it covers infotainment, telematics, diagnostics, charging infrastructure, OTA platforms, and aftermarket digital components, expanding the connected vehicle attack surface. Automakers and suppliers must now treat security as a compliance obligation rather than an optional feature.

NHTSA orders Tesla to defend Cybercab certification

Automotive World | 16 Sep 2026, 18:39 SGT

NHTSA issued a formal Special Order demanding Tesla provide sworn answers by 30 September on how the Cybercab, which lacks a steering wheel, pedals, and mirrors, complies with federal motor vehicle safety standards. The order escalates an earlier audit query into a legal demand carrying penalties up to USD 139 million and potential criminal liability for the signing officer. The dispute centres on Tesla self-certification of a vehicle architecture that federal standards assume a human driver controls. The outcome could reshape how autonomous vehicles without manual controls are certified in the US.

Korea, Hyundai Motor Hold Joint Drill on Car Hacking Response - Seoul Economic Daily

seouleconomicdaily | 15 Sep 2026, 10:00 SGT

South Korean authorities and Hyundai Motor staged a joint drill focused on responding to car hacking incidents, exercising the handoff between government cyber response teams and the automaker during a simulated vehicle compromise. The exercise covered Hyundai vehicle platforms and the coordination channels used to detect, contain and report an automotive cyber incident. It reflects a regulatory trend in which national governments treat connected vehicles as critical infrastructure requiring joint public-private response. No vulnerability, CVE or confirmed breach was reported, and the drill serves as a capability test ahead of stricter automotive cybersecurity requirements.

Affected Vehicle Make & Model: Hyundai

From paper to pavement: Global self-driving rules enter the real world

news.cgtn.com | 14 Sep 2026, 17:00 SGT

China approved national standard GB 44721-2026 on July 30, taking effect July 1, 2027, covering Level 3 and Level 4 automated driving systems for M and N category vehicles. The standard adds detailed safety boundary, user notification, and standardized test scenario requirements beyond the international ADS GTR, making China faster than many contracting parties in converting the global framework into binding domestic rules. Global automakers face a compliance gap since meeting one framework does not guarantee meeting the other.

Pony.ai, Verne Launch Europe's First Fully Driverless Robotaxi Passenger Testing - Gasgoo

gasgoo | 12 Sep 2026, 12:09 SGT

Pony.ai and Verne launched Europe's first fully driverless robotaxi passenger testing, marking a milestone for commercial autonomous ride-hailing on the continent. The partnership combines Pony.ai's autonomous driving stack with Verne's operations, positioning Europe as an emerging market for driverless passenger services.

WeRide, Uber, AVOMO secure Spain's first L4 autonomous passenger vehicle permit | Gasgoo

Autonews | 12 Sep 2026, 03:54 SGT

WeRide, Uber and AVOMO secured Spain's first national-level L4 autonomous vehicle permit for the Robotaxi GXR, with commercial service planned in Madrid during 2026 via the Uber app. The partners aim to expand toward fully driverless operations across central Madrid. The authorization is the first EU national permit for the GXR and may serve as a regulatory reference for future robotaxi certification in Europe.

NHTSA Audits Tesla Cybercab Self-Certification Hours After Austin Robotaxi Launch - Startup Fortune

startupfortune | 12 Sep 2026, 02:16 SGT

NHTSA opened an audit of Tesla's Cybercab self-certification just hours after Tesla launched its robotaxi service in Austin, Texas. The timing signals heightened federal scrutiny of Tesla's exemption-based approach to deploying vehicles without traditional steering controls. It raises regulatory risk for Tesla's robotaxi rollout timeline.

EU's Cyber Resilience Act starts the 24-hour vulnerability clock

The Register | 11 Sep 2026, 19:34 SGT

The EU Cyber Resilience Act has entered its mandatory reporting phase, requiring manufacturers of products with digital elements to disclose actively exploited vulnerabilities and severe security incidents through ENISA's new Single Reporting Platform. Under Article 14, manufacturers must notify both the relevant CSIRT coordinator and ENISA without undue delay, with an initial 24-hour reporting window. This obligation directly affects connected vehicle and automotive IoT manufacturers selling into the EU market. Non-compliance exposes automakers and suppliers to regulatory penalties, making vulnerability monitoring and incident response capabilities an operational requirement rather than a voluntary practice.

Why Is Japan seeing an extreme surge in Ransomware Cases

Cybersecurity-Insiders | 10 Sep 2026, 23:19 SGT

Japan has seen an extreme surge in ransomware cases, with manufacturing accounting for the largest share of victims in 2026, followed by automotive-related businesses. The country's highly connected business environment, spanning manufacturers, automotive companies, logistics providers, and suppliers, enables attackers to pivot from one compromised company to disrupt partners and suppliers. The interconnected nature of Japanese automotive supply chains amplifies the blast radius of each incident. The trend signals an ongoing threat requiring supply chain segmentation and third-party risk monitoring across the sector.

Lyft expands its Waymo robotaxi partnership in Nashville

Axios | 10 Sep 2026, 03:25 SGT

Lyft has expanded its partnership with Waymo to include Nashville, Tennessee, where Lyft riders can now be matched with Waymo robotaxis. The integration allows Lyft to offer autonomous rides in a new city without owning the technology. This move strengthens Lyft's position as a key fleet partner for Waymo as the robotaxi service expands beyond its initial markets.

45 Tesla Cybercabs Are Now Roaming Austin. Here's What That Means for the Robotaxi Business Wall Street Has Been Waiting For. - The Motley Fool

themotleyfool | 10 Sep 2026, 01:34 SGT

Tesla has deployed 45 Cybercabs in Austin, marking the first public operation of its dedicated robotaxi vehicle. The fleet's presence provides real-world data on autonomous ride-hailing performance and economics. This deployment is a key test for Tesla's robotaxi business model that Wall Street has been anticipating.

Tesla is building Superchargers only its robotaxis can use, five years after opening them - The Next Web

thenextweb | 10 Sep 2026, 01:07 SGT

Tesla is constructing Supercharger stations exclusively for its robotaxi fleet, reversing its earlier open-network policy. These dedicated chargers are likely located at fleet hubs and optimized for autonomous operation. This move indicates a shift toward fleet-specific infrastructure to support the Cybercab's commercial rollout.

Silicon Motion Earns ISO/SAE 21434 Automotive Cybersecurity Process Certification - PR Newswire

prnewswire | 09 Sep 2026, 21:00 SGT

Silicon Motion, a supplier of NAND flash controllers, announced it has earned ISO/SAE 21434 automotive cybersecurity process certification for its product development lifecycle. This certification applies to its automotive-grade storage solutions used in connected and autonomous vehicles. The achievement signals compliance with industry-standard cybersecurity requirements, which is increasingly a prerequisite for automakers and Tier 1 suppliers integrating storage in AV platforms.

What DOT’s Automated Vehicle Strategy Means for Trucking - Heavy Duty Trucking

heavydutytrucking | 09 Sep 2026, 00:50 SGT

The U.S. Department of Transportation released its automated vehicle strategy, which outlines a federal framework for regulating self-driving trucks. The strategy is significant for the trucking industry as it provides guidance on safety standards and deployment policies. This federal approach aims to create a consistent regulatory environment, potentially accelerating the adoption of autonomous trucking across states.

Waymo is poised for Oakland

Oaklandside | 09 Sep 2026, 00:24 SGT

Waymo has received official approval to operate its autonomous ride-hailing service in Oakland, California. The expansion follows its existing operations in San Francisco and comes as Alphabet pressures Waymo to generate meaningful revenue. This approval marks a significant step in broadening Waymo's geographic footprint within the Bay Area and scaling its commercial operations.

Affected Vehicle Make & Model: Tesla, Cybercab

Tesla Cybercab First Ride: What It’s Really Like to Use Tesla’s New Autonomous Taxi - MotorTrend

motortrend | 08 Sep 2026, 23:25 SGT

MotorTrend published a first-ride review of Tesla's Cybercab autonomous taxi, detailing the user experience of the purpose-built robotaxi. The review provides early insights into the vehicle's interior design, ride quality, and the functionality of its autonomous driving system. This marks a significant step in evaluating Tesla's robotaxi service concept against competitors like Waymo.

Driverless taxis arrived in London — minus the part where they’re driverless – Martin Cid Magazine

Martincid | 08 Sep 2026, 23:00 SGT

Wayve and Uber launched a supervised autonomous ride-hailing service in London, the first of its kind in the UK, using a fleet of 15 Ford Mustang Mach-E vehicles. Each vehicle operates with a TfL-licensed driver on board under current regulations, meaning the service is not fully driverless. This launch represents a cautious regulatory approach to autonomous vehicles in the UK, contrasting with fully driverless operations elsewhere.

States Are Writing Sensor Checklists Into Self-Driving Laws. The AI Behind the Wheel Is What Actually Matters. - Unite.AI

unite | 08 Sep 2026, 21:07 SGT

Several U.S. states are incorporating specific sensor requirements into their self-driving vehicle laws, focusing on hardware specifications. An analysis argues that this approach is misguided because the software and AI algorithms are the true determinants of autonomous vehicle safety. This regulatory trend could create technical compliance burdens and stifle innovation by prioritizing hardware over software performance.

Cybercab launches to muted reception and a federal audit

Automotive World | 07 Sep 2026, 22:02 SGT

Tesla launched public rides in its Cybercab robotaxi on 4 September, but the US National Highway Traffic Safety Administration (NHTSA) immediately opened a formal audit of roughly 1,000 Cybercabs to examine Tesla's self-certification of federal vehicle-safety standards. The vehicle lacks conventional human controls, raising questions about compliance with existing FMVSS requirements. This audit creates regulatory uncertainty for Tesla's autonomous vehicle deployment and signals increased federal scrutiny of self-certification processes across the industry. Automakers developing similar vehicles must prepare for stricter oversight and potential changes to safety standards.

Tesla FSD Can Now Take Over Even When You’re Driving Manually - Autoblog

autoblog | 07 Sep 2026, 20:15 SGT

Tesla's Full Self-Driving (FSD) software has been updated to allow the system to take over control even when the driver is manually operating the vehicle. This new capability, reported by Autoblog, changes the interaction model between driver and system, potentially intervening in real-time driving situations. The update is significant as it alters the driver's role and raises questions about safety and system authority in Tesla's vehicles.

North Korean Hackers Deploy New Linux Espionage Toolkit

SecurityWeek | 07 Sep 2026, 20:12 SGT

North Korean hackers have deployed a new Linux espionage toolkit that embeds a backdoor in HAProxy, targeting automotive and media organizations in South Korea for long-term surveillance. The toolkit enables stealthy data exfiltration and persistent access to compromised networks, specifically affecting companies in the automotive sector that use HAProxy for load balancing. This campaign poses a significant risk of intellectual property theft and operational disruption for automotive firms. Organizations should audit their HAProxy deployments for unauthorized modifications and enhance network monitoring to detect this advanced persistent threat.

China Moves to Address Self-Driving Cars in National Law - Sixth Tone

sixthtone | 07 Sep 2026, 19:38 SGT

China is moving to incorporate self-driving cars into its national legal framework, a significant step toward formal regulation of autonomous vehicles. This legislative action aims to provide legal clarity for testing and deployment across the country. It positions China as a leader in creating a structured regulatory environment, which could accelerate commercial AV rollout and attract investment.

Waymo Riders Report ‘Significant Decline in Service,’ Pickup Issues

Eletric-Vehicles | 07 Sep 2026, 19:08 SGT

Waymo expanded public autonomous service to Denver, San Diego, and Tampa on September 1, reaching 14 cities, with Las Vegas and London listed as next. The company reported over 500,000 paid rides weekly, targeting one million by year-end, and passed 200 million fully autonomous miles. This rapid scaling underscores Waymo's operational lead but also raises questions about service quality and recall management across multiple markets.

2026 Maruti Baleno Alpha Optional Variant Explained In Detail: Fully Loaded With ADAS Level-2! - CarDekho

cardekho | 07 Sep 2026, 19:00 SGT

Maruti Suzuki's 2026 Baleno Alpha variant will offer an optional ADAS Level-2 package, bringing advanced driver assistance to a mass-market hatchback in India. This marks a significant step in democratizing ADAS technology in a price-sensitive market. The move could accelerate the adoption of safety features across the Indian automotive industry, pushing competitors to follow suit.

Waymo vs Zoox: U.S. Robotaxi Race and Investor Impact

Indmoney | 07 Sep 2026, 16:15 SGT

Zoox received a NHTSA temporary exemption for commercial use of its purpose-built robotaxi without conventional human controls, covering up to 2,500 vehicles annually. The company also recalled software in 105 vehicles after an unoccupied robotaxi encountered heavy smoke at an emergency scene and braked hard. This marks a regulatory milestone for driverless vehicle design while highlighting safety scrutiny for unoccupied operations.

CRA Reporting Requirements Effective September 11, 2026

Taylorwessing | 07 Sep 2026, 14:55 SGT

The Cyber Resilience Act (CRA) reporting requirements under Article 14 become effective on September 11, 2026, applying to companies offering diagnostic devices, charging infrastructure, software, or aftermarket products alongside type-approved vehicle components. Actively exploited vulnerabilities and serious security incidents will require mandatory reporting to authorities, with clear evidence of unauthorized exploitation needed. This regulation expands the compliance burden beyond traditional vehicle components, affecting a wide range of automotive technology suppliers. Companies must establish incident detection and reporting processes well before the 2026 deadline to ensure compliance with the CRA.

Uber Predicts No One Will Own Private Cars in 15 Years – A Revelation That Thrills Elon Musk

Eu | 07 Sep 2026, 14:00 SGT

Uber's CEO predicted the end of private car ownership within 15 years, citing the growth of robotaxi services. In China, over 20 cities now host commercial L4 driverless taxis, with Apollo Go surpassing 23 million orders and Pony.ai achieving positive single-car profit. Tesla's Cybercab began commercial operation in Austin on September 3, 2026, a fully driverless vehicle without steering wheel or pedals, signaling a shift toward asset-light mobility models.

USDOT AV Strategy Targets Automated Truck Rules

Act-News | 05 Sep 2026, 21:00 SGT

The USDOT released its National Strategy for Automated Vehicles for fiscal years 2026-2030, outlining priorities for safety oversight and regulatory modernization. The strategy specifically directs FMCSA to develop rules for autonomous trucks, covering carrier operations and maintenance that currently assume a human driver. This federal roadmap is a critical step toward establishing a clear regulatory framework for commercial deployment of driverless freight vehicles in the US.

CARS24 Data Breach Exposes 3,100 Customer Records, Leads Allegedly Sold for INR1,000 Each

GBHackers | 05 Sep 2026, 14:59 SGT

Used-car platform CARS24 reported a data breach affecting approximately 3,100 customer records, with stolen leads allegedly sold to a rival business and outside dealers for about 1,000 rupees each. The company filed a complaint with a Cyber Crime Police Station, estimating a commercial loss of 5.70 crore rupees. This incident exposes customer data handling risks in the online automotive sales sector. The ongoing investigation and potential legal action underscore the need for stronger data protection measures in automotive retail platforms.

Musk pushes regulatory limits with Tesla's Cybercab robotaxi service - Reuters

reuters | 05 Sep 2026, 06:17 SGT

Reuters reports that Tesla CEO Elon Musk is pushing regulatory boundaries to launch the Cybercab robotaxi service, potentially bypassing traditional safety approvals. The move challenges existing federal and state oversight frameworks for autonomous vehicles. This could set a precedent for other AV companies seeking faster deployment but raises significant safety and liability concerns.

Affected Vehicle Make & Model: Tesla, Cybercab

Tesla Withholds FSD Crash Data From Prosecutors in Fatal Illinois Turn Case

Techtimes | 05 Sep 2026, 03:14 SGT

Tesla is withholding FSD crash data from prosecutors in a fatal Illinois turn case, while senators and a Reuters investigation question the accuracy of its safety statistics. NHTSA has opened an engineering analysis covering 3.2 million vehicles focusing on camera degradation failures. This scrutiny could lead to stricter federal oversight and undermine public trust in Tesla's FSD safety claims.

IDScan sued over alleged data breach affecting 153 million drivers

BleepingComputer | 05 Sep 2026, 00:56 SGT

IDScan faces multiple lawsuits after hackers allegedly breached its identity verification service and offered 153 million driver's licenses for sale. The breach affects the company's customers, which include automotive dealerships and rental agencies that use IDScan for driver verification. This incident exposes the risk of mass personal data exposure through third-party identity services used across the automotive retail sector. The legal action signals a growing liability for companies that fail to protect driver data, prompting a need for stronger vendor security assessments.

Cybersecurity "critical" to EV charging sector - transportandenergy.com

transportandenergy | 04 Sep 2026, 17:34 SGT

An article from transportandenergy.com reports that cybersecurity is deemed critical to the EV charging sector, indicating a growing recognition of vulnerabilities in charging infrastructure. The sector faces risks from potential attacks on charging networks, which could disrupt grid stability, compromise payment data, or enable remote manipulation of chargers. This affects charging network operators, EV manufacturers, and utilities that depend on secure communication between vehicles and chargers. The industry must prioritize security-by-design in charging standards and implement robust monitoring and incident response for charging infrastructure.

France starts tests on Tesla's self-driving tech - Reuters

reuters | 03 Sep 2026, 21:28 SGT

France has initiated testing of Tesla's self-driving technology on its roads. The tests involve Tesla's advanced driver assistance systems and are being conducted under French regulatory oversight. This marks a significant step for Tesla's European expansion and could influence future autonomous vehicle regulations in the EU.

London’s first self-driving taxis hit the road with Wayve

Automotive World | 03 Sep 2026, 19:30 SGT

London launched its first self-driving taxi service on 3 September, with Wayve's AI-powered vehicles operating on the Uber platform. The fleet is small, with only 15 licensed vehicles, each carrying a trained safety driver, and the service is priced at standard fares. This development affects Wayve, Uber, and the autonomous vehicle market in the UK, positioning them ahead of competitors like Waymo and Baidu. The impact is a significant step for autonomous ride-hailing in Europe, but the limited fleet size and safety driver requirement indicate a cautious approach to deployment.

Tesla Settles Its Autopilot Fire Truck Case Right Before A Jury Could Weigh In - Carscoops

carscoops | 03 Sep 2026, 18:39 SGT

Tesla settled a lawsuit related to a crash where its Autopilot system was involved in a collision with a fire truck, just before a jury verdict was to be reached. The settlement avoids a public legal ruling on the system's safety. This outcome may set a precedent for how Tesla handles similar litigation and could impact future product liability cases in the AV industry.

FBI Probes Possible Breach of 153 Million Driver’s Licenses

Infosecurity Magazine | 03 Sep 2026, 17:33 SGT

The FBI is investigating the sale of scans from over 153 million driver's licenses on the dark web. This data breach affects individuals whose personal identification information is exposed, with potential implications for identity theft and fraud. The automotive industry is impacted as driver's licenses are often used for vehicle rentals, purchases, and dealership financing, increasing the risk of fraudulent transactions. The investigation is ongoing, and consumers and businesses should monitor for unauthorized use of their data.

Your car is a computer on wheels. Israel is telling drivers how to protect it | Ctech

Calcalistech | 03 Sep 2026, 15:30 SGT

Israel's Ministry of Transportation has issued its first public recommendations for drivers and garages to protect vehicles against cyber incidents, addressing risks from OTA updates and EV charging stations. The guidance responds to growing threats where connected cars could be disrupted in terrorist or ransomware campaigns. This regulatory move signals a shift toward government-led consumer cybersecurity guidance in the automotive sector. Manufacturers and service chains in Israel must align with these recommendations to reduce attack surfaces and enhance national vehicle security posture.

The 2026 Dealership Cyber Crisis: 3 Attacks and How to Reduce Risk

Dealermarketing | 03 Sep 2026, 13:00 SGT

A 2026 cyber incident at a third-party vendor serving Nissan and Infiniti dealerships led to the Everest ransomware group leaking 910 gigabytes of data, including dealership information and customer financial records. The attack targeted the vendor's file-transfer system, not Nissan's own network, which the automaker stated remained uncompromised. This incident underscores the supply-chain risk to automotive retail networks, where third-party access can expose sensitive customer data. Dealerships and OEMs must enforce stricter vendor security assessments and incident response protocols to mitigate similar breaches.

SEC Theatre: Inside the DBC Files That Pretend Your Car is Secure

Medium | 02 Sep 2026, 23:00 SGT

Security researchers demonstrated a full vehicle compromise by hacking a Harman infotainment system via its cellular connection, achieving code execution on a CAN bus-connected component and sending arbitrary CAN messages. This attack path affects vehicles equipped with Harman infotainment units, showing that cellular interfaces can be a direct entry point to critical vehicle networks. The risk is high, as remote exploitation could enable control of safety-critical functions. The finding implies that automakers must harden infotainment systems and segment CAN networks to prevent such lateral movement.

Tesla’s new FSD safety data is nine months out of date

Automotive World | 02 Sep 2026, 19:21 SGT

Tesla published European Full Self-Driving safety data on 1 September, claiming the system is 4.1 times less likely to be involved in a collision than manual driving, but the supporting document's data windows all close in 2025, months before the April-to-August 2026 period the figure covers. The dashboard shows mileage distribution for calendar 2025, automatic emergency braking data through 31 October 2025, and lane-change metrics stopping in early December 2025, with no 2026 data recorded. This discrepancy raises concerns about the validity of Tesla's safety claims ahead of a potential EU-wide approval vote expected as soon as 6 October. The implication is that regulators and consumers may question the integrity of Tesla's safety data, potentially impacting the approval process and the company's credibility in the autonomous driving market.

Article 2(2)(c) Exempts Your Vehicle From the EU Cyber Resilience Act. It Doesn't Exempt What You Bolted to It

Automotive IQ | 02 Sep 2026, 18:01 SGT

The EU Cyber Resilience Act (CRA) exempts type-approved vehicles under Regulation (EU) 2019/2144, which mandates UN R155 and R156, but does not exempt aftermarket components bolted to those vehicles. This means add-on digital devices, such as telematics or infotainment retrofits, fall under CRA obligations starting September 11, 2026. Automotive suppliers and integrators must ensure these components meet CRA reporting and security requirements, separate from existing CSMS processes. The implication is a dual compliance burden for vehicle modifications, requiring distinct security assessments.

Tesla FSD Pothole Avoidance Confirmed: Why v15 May Ship What v14 Cannot - Tech Times

techtimes | 02 Sep 2026, 03:47 SGT

Tesla's Full Self-Driving (FSD) software has confirmed pothole avoidance capabilities, with version 15 expected to ship features that version 14 cannot handle. This improvement enhances the safety and reliability of Tesla's autonomous driving system. It could boost consumer confidence and accelerate the rollout of FSD in more regions.

Toyota’s FSD-like system arrives in 2028, but the driver stays liable - The Next Web

thenextweb | 02 Sep 2026, 02:32 SGT

Toyota announced a new Full Self-Driving-like system, branded as 'Guardian', which will launch in 2028. The system will provide advanced driver assistance but will keep the human driver legally liable for vehicle operation. This approach contrasts with Tesla's FSD and highlights a more cautious, supervised autonomy strategy from a major automaker.

Electrical issue prompts recall of 27K Lucid Air EVs

WardsAuto | 02 Sep 2026, 00:15 SGT

Lucid Motors recalled nearly 27,000 Air EVs in the U.S. due to an electrical issue in the lighting system, affecting almost all delivered vehicles. The company pushed an over-the-air software fix to resolve the problem, avoiding a physical service visit. This recall highlights the growing role of OTA updates in addressing safety-related defects in electric vehicles. Automotive manufacturers should ensure their OTA infrastructure is secure and reliable to handle such recalls efficiently.

Copper thieves increasingly targeting EV charging cables in B.C. - CBC

cbc | 31 Aug 2026, 21:34 SGT

Copper thieves are increasingly targeting EV charging cables in British Columbia, Canada, according to CBC. This affects electric vehicle charging infrastructure, including public charging stations operated by various providers. The impact includes operational downtime for charging networks, increased repair costs, and potential safety hazards for users. Charging network operators may need to implement theft-deterrent measures, such as reinforced cables or surveillance, to mitigate this ongoing threat.

Uber joins Seoul robotaxi platform race as 1st foreign bidder - KED Global

kedglobal | 31 Aug 2026, 21:09 SGT

Uber has entered the Seoul robotaxi platform race as the first foreign bidder, according to KED Global. The company aims to offer its ride-hailing platform for autonomous vehicles in South Korea's capital. This entry intensifies competition with local firms and tests Uber's ability to integrate with Korean AV technology providers.

AI and Automotive Security Bills Face Markup in House

Legis1 | 31 Aug 2026, 21:00 SGT

The U.S. House Energy and Commerce Committee will mark up twelve bills, including the Open-Source AI Leadership Act and the Automotive National and Economic Security Act of 2026. The automotive bill aims to address supply chain security and industrial strategy amid China's advances in AI chips and memory. This legislative action could shape the regulatory landscape for autonomous vehicle technology and its underlying AI systems.

Automotive Cybersecurity Must Start at the Chip Level: Infineon, Vector Informatik - Autocar Professional

autocarprofessional | 31 Aug 2026, 20:12 SGT

Infineon and Vector Informatik advocate for embedding cybersecurity at the semiconductor level rather than as an afterthought in vehicle design. The approach targets hardware-based security modules and secure software integration across electronic control units and in-vehicle networks. This development affects chipmakers, Tier 1 suppliers, and OEMs seeking to meet UN R155 and ISO 21434 compliance. The implication is a shift toward foundational security architecture to mitigate firmware and supply chain attack vectors.

Physical AI at national scale: HUMAIN and Applied Intuition

Appliedintuition | 31 Aug 2026, 20:00 SGT

HUMAIN and Applied Intuition announced a strategic collaboration to deploy physical AI across Saudi Arabia, starting with what they claim will be the world's largest autonomous trucking network. The partnership will expand into robotaxis, ports, mining, manufacturing, agriculture, and construction. This marks a significant national-scale deployment of autonomous technology in the Middle East, moving beyond pilot programs to commercial operations.

How will Waymo’s robotaxis affect Denver?

Denvergazette | 31 Aug 2026, 19:00 SGT

Waymo is preparing to launch its robotaxi service in Denver, Colorado, raising local questions about safety, policy, privacy, and impacts on emergency operations. The rollout coincides with the city's efforts to reduce car dependency and concerns from law enforcement and immigrant advocacy groups about vehicle cameras. This deployment highlights the growing tension between municipal priorities and the expansion of commercial autonomous vehicle operations.

Teamsters suit tests California’s driverless truck rules - FreightWaves

freightwaves | 31 Aug 2026, 19:00 SGT

The Teamsters union filed a lawsuit challenging California's regulations that permit driverless truck testing without a human safety driver. The suit targets the state's DMV rules, arguing they bypass legislative oversight and pose safety risks. This legal battle could delay autonomous freight deployment in California and set a precedent for other states.

DiDi launches R2 driverless service tests in China

Automotive World | 31 Aug 2026, 13:05 SGT

DiDi Autonomous Driving has launched fully driverless service trials of its R2 robotaxi in Beijing and Guangzhou, marking commercial deployment of a level 4 vehicle developed with GAC Aion. The R2 features 33 sensors, a triple-domain fusion computing platform, and multi-layer redundancy, with safety compliance under C-NCAP and Euro NCAP standards. This development advances autonomous vehicle deployment but introduces new cybersecurity considerations for remote operation and passenger data handling. The industry must monitor these systems for vulnerabilities as they scale, with implications for regulatory standards and public safety.

China's new rules give smart-vehicle sensors more design freedom - CnEVPost

cnevpost | 31 Aug 2026, 12:14 SGT

China's new regulations for smart vehicles allow more flexible placement and design of sensors like lidar and cameras. This change gives automakers and tech companies greater freedom to integrate perception hardware, potentially accelerating development of advanced driver assistance and autonomous systems. It reflects China's push to lead in smart vehicle innovation while maintaining safety standards.

731 Hyundai Avante Hybrid sedans recalled in Singapore due to risk of fire

The Straits Times | 31 Aug 2026, 11:50 SGT

A recall of 731 Hyundai Avante Hybrid sedans in Singapore addresses a fire risk from an overheating transistor in the power control unit. The affected vehicles, manufactured between October 2024 and January 2026, may fail to start, enter limp mode, or suffer localized thermal damage including melting or fire. Komoco Motors, the distributor, is preparing recall letters after Land Transport Authority approval on August 27. Owners should respond to the recall to mitigate the fire hazard.

Affected Vehicle Make & Model: Hyundai, Avante Hybrid

Mass Scale Hijacking Threatens Rentable IoT | StartupHub.ai

Startuphub | 29 Aug 2026, 02:03 SGT

Researchers at Black Hat Asia 2026 demonstrated a mass-scale hijacking attack on rentable IoT devices, including EV chargers, by exploiting a single vulnerability that replicates across devices sharing the same ID scheme. A Tsinghua demo disabled shared chargers in Shanghai by copying a charger ID into a script, flipping its map icon to gray. This attack vector affects EV charging infrastructure and other public IoT devices, enabling citywide denial of service. The implication is that device manufacturers must implement unique per-device authentication and secure protocol implementations to prevent fleet-wide compromise.

Observed MITRE ATT&CK techniques: T1059 Command and Scripting Interpreter | T1078 Valid Accounts | T1499 Endpoint Denial of Service

London robotaxi launch stalls as TfL guidance remains pending - Zag Daily

zagdaily | 29 Aug 2026, 01:06 SGT

The launch of robotaxi services in London has stalled because Transport for London (TfL) has not yet issued final guidance. This regulatory delay affects companies like Waymo that are preparing to operate in the city. The hold-up underscores the critical role of local regulatory frameworks in determining the pace of autonomous vehicle deployment in major global cities.

Council to explore autonomous vehicle safety standards - St Pete Catalyst

stpetecatalyst | 28 Aug 2026, 22:26 SGT

A city council is initiating a study to explore autonomous vehicle safety standards. This regulatory action aims to establish guidelines for AV operations within the city. The move reflects growing municipal interest in proactively managing the deployment of self-driving vehicles to ensure public safety.

LG Innotek Zoox camera deal supplies robotaxi production

Automotive World | 28 Aug 2026, 14:00 SGT

LG Innotek is supplying automotive camera modules for the serial production of Zoox's purpose-built robotaxi fleet, covering high-resolution cameras with 360-degree views and five fields of view. This affects Zoox's robotaxi vehicles and LG Innotek's camera technology, which are integral to autonomous driving systems. The risk is low from a cybersecurity perspective, as the article focuses on a supply agreement rather than a vulnerability. The implication is that the camera modules will be deployed in commercial robotaxis, requiring ongoing security validation for autonomous driving functions.

China Flexes its Auto-Safety Chops With Huge Recall of Tesla, Other Cars

Insurancejournal | 28 Aug 2026, 13:05 SGT

China issued a massive recall affecting Tesla and other automakers to address the risk of occupants being trapped in EVs during power failures. This action demonstrates Beijing's growing influence in setting global auto safety standards, particularly for advanced electric and autonomous vehicles. Automakers like Tesla are expected to design vehicles to meet Chinese requirements.

Affected Vehicle Make & Model: Tesla, Model Y

Dutch company MyWheels adds Tesla full self-driving software to shared fleet - NL Times

nltimes | 28 Aug 2026, 13:00 SGT

Dutch car-sharing company MyWheels is adding Tesla's Full Self-Driving (FSD) software to its shared fleet. This integration allows users to rent Teslas equipped with supervised autonomous driving capabilities. It marks a significant adoption of FSD in a European car-sharing context, potentially influencing consumer acceptance and regulatory discussions on autonomous vehicles.
